Key Insight

- Enterprise drives 74% of total MRR (\$7.55M of \$10.16M) but also carries the highest churn rate (72.8%) — our largest revenue segment is also our highest-risk one.
- Revenue churn (10.4%) is well below customer churn (70.4%), indicating churn is concentrated among lower-value accounts.
- \$7.14M of reported MRR sits with accounts that have an open churn event but no formally closed subscription. Confirmed, retained MRR is closer to \$3.02M — this is the number we should

Churn Reasons

Churn Events by Calendar Month

Churn Rate by Plan

Key Insight

- Churn follows a clear seasonal pattern, rising from 21 events in January to 133 in December — a 6x increase across the year.
- No single driver stands out: product gaps, support experience, and budget constraints each account for roughly 15-19% of churn, pointing to a multi-pronged retention strategy rather than a single fix.
- Retention varies meaningfully by signup cohort.

Customer Churn Rate by usage_bucket

Customer Churn Rate by Support Ticket Bucket

account_name	current_plan	MRR	usage_bucket	Support Tickets	Customer Health
Company_0	Enterprise	12603	Medium Usage	2.00	Churned
Company_1	Pro	10004	Low Usage	3.00	Healthy
Company_10	Basic	26833	High Usage	3.00	Churned
Company_100	Basic	904	Medium Usage	8.00	Churned
Company_101	Enterprise	20609	High Usage	7.00	Healthy
Company_102	Basic	10462	Medium Usage	5.00	Churned
Company_103	Basic	3678	Low Usage	4.00	Churned
Company_104	Pro	12868	High Usage	6.00	Churned
Company_105	Pro	29559	High Usage	3.00	Churned
Company_106	Pro	7451	Low Usage	5.00	At Risk

Key Insight

- Tenure is the strongest churn predictor in this dataset. Usage level and support ticket volume, by contrast, show only weak correlation with churn (68-72% across all buckets) — engagement alone does not explain most attrition here.
- This challenges a common assumption: higher support activity does not translate into meaningfully higher churn, and low usage is not a reliable early-warning signal on its own.

Revenue Concentration %

Key Insight

- 19 customers right now are showing warning signs — they barely use the product and have filed a lot of support tickets. Worth reaching out to them before they leave.
- Company_137 stands out the most, at \$30,385 in monthly revenue — followed by several others in the \$11K-\$28K range.
- Together, these 19 accounts

Churn Rate by Channel

Customers by Acquisition Channel

Average of current_mrr by referral_source

Key Insight

- Partner is our smallest acquisition channel (89 customers) but has the highest churn rate of any channel (75.3%), ahead of Organic (74.6%), our largest channel.
- Ads-sourced customers show the strongest retention (60.2% churn) — the lowest of all channels, and worth examining for replicable acquisition or onboarding practices.
